

## Ontario Sensus Meter Deployment Information

Smart Meters are modernizing our out-dated, inefficient energy infrastructure. They help give consumers greater control over their energy consumption and allow them to better participate in energy conservation. The Ontario Energy Board has gathered information on smart meter model types that are used by electricity distributors across Ontario. The Board has confirmed that no utilities in Ontario use the Sensus Generation 3.3 meters, the model used in Saskatchewan. The following chart provides information about those utilities that are using Sensus meters.
