“We are expecting oil imports [to Canada] to remain high even with the Line 9 reversal. Eastern Canadian refiners want the light-sweet crude, and the U.S. Can give it to them”

# WCSB Takeaway Capacity vs. Supply Forecast

# 2014 CAPP Crude Oil Forecast

\*Refers to the portion of U.S. Bakken production that is also transported on the Canadian pipeline network. Capacity shown can be reduced by temporary operating and physical constraints.
