

Monthly "Electricity" Line Impacts for Residential Consumers
May 1, 2007 Regulated Price Plan (RPP) Changes

The following charts show examples of the impact of the Regulated Price Plan (RPP) on the "Electricity" line of consumers bills based on different monthly consumption levels. The examples take into account the change from the winter season (November to April) consumption threshold of 1,000 kWh / month to the summer season (May to October) consumption threshold of 600 kWh / month. The consumption threshold is the amount of electricity that is charged at the lower RPP price.
