Subject:

Please find attached corrections to pages 9-11 and 21 of APPrO's prefilled evidence.

With respect to pp. 9-11, in reviewing the analysis behind Figure 1 and Table 1, it was discovered that some of the three-hour-ahead (T-3) and actual data had been shifted one hour, and so was being compared with day ahead data in respect of the following hour. Correcting this error reduces the apparent variability in hourly demand between the day ahead and T-3 or real time. The error had minimal effect on whole-day demand variability. The error had no impact on the shorter term variability results. We also identified in this process a small additional number of hours for which the T-3 forecasts appear to be anomalous, so we eliminated these from the analysis, resulting in minor corrections to the shorter term variability results.

The data set for the price-based analysis in section 2.2.3 (v) is independent of that for the volume based analysis discussed above. There is no change to the price based analysis.

The correction to p. 21 relates to a typo.
