Ms. Kirsten Walli
Secretary
Ontario Energy Board
Suite 2700, 2300 Yonge Street
P.O. Box 2319
Toronto, ON.
M4P 1E4

Dear Ms. Walli:

EB-2006-0189 – Hydro One Networks' Application for Approval of Connection Procedures pursuant to the Transmission System Code

On July 25, 2005 the Board issued revisions to the Transmission System Code. The revised Code came into force on August 20, 2005. In accordance with section 6.1.5 of the revised Code, Hydro One is filing ten (10) copies of its transmission connection procedures within one year of that date for the Board's approval.

Hydro One has developed the procedures to comply with the revised Code and to assist generator and load customers in applying for connections to the transmission system. The procedures were reviewed through consultations with key customer groups in the first half of 2006. Hydro One is developing the processes necessary to provide transmission plans and available capacity information to customers, and to conduct other activities contained in the procedures in a timely manner when connection requests are made in the future. Hydro One anticipates that it will be able to comply with these procedures within 90 days of the approval by the Board.

While it is not part of this filing, a copy of the Connection Process document, which is referenced in the Hydro One submission, will be posted on the Hydro One Networks' website at www.HydroOneNetworks.com.

Hydro One will be pleased to provide the Board or interested parties with additional information to explain the connection procedures, if that assists the Board in approving these procedures.

Finally, Hydro One requests that documents filed with the Board in this proceeding be served as follows

Mr. Glen MacDonald
Senior Advisor – Regulatory Research and Administration
Regulatory Affairs
