

EB-2007-0050

IN THE MATTER OF the *Ontario Energy Board Act 1998*, S.O.1998, c.15, (Schedule B) (the “Act”);

AND IN THE MATTER OF an Application by Hydro One Networks Inc. pursuant to section 92 of the Act, for an Order or Orders granting leave to construct a transmission reinforcement project between the Bruce Power Facility and Milton Switching Station, all in the Province of Ontario.

PROCEDURAL ORDER NO. 8
The Leave to Construct Application

Hydro One Networks Inc. (“Hydro One”) filed an amended application (the “Amended Leave to Construct Application”) with the Ontario Energy Board (the “Board”) dated November 30, 2007 under section 92 of the Ontario Energy Board Act, 1998, S.O. 1998, c.15, Schedule B (the “Act”). This Amended Leave to Construct Application addresses certain changes to Hydro One’s original application filed with the Board on March 29, 2007.

Hydro One is seeking an Order of the Board to construct approximately 180 kilometres of double-circuit 500 Kilovolt (“kV”) electricity transmission line adjacent to the existing transmission corridor (500 kV and/or 230 kV) extending from the Bruce Power Facility in Kincardine Township to Hydro One’s Milton Switching Station in the town of Milton. Hydro One also proposes to make modifications at the Milton, Bruce A and Bruce B transmission stations to accommodate the new transmission lines. This Leave to Construct Application was given Board file No. EB-2007-0050.

Hydro One has submitted that the project is required to meet the increased need for transmission capacity associated with the development of wind power in the Bruce area and the return to service of nuclear units at the Bruce Power Facility. Hydro One proposes an in-service date of Fall 2011 for the new 500 kV transmission line and

related facilities. The estimated cost of the transmission project is approximately \$635 million.

Four Procedural Orders addressing scheduling, issues development and preliminary matters were issued in succession following receipt of the Application.

On February 25, 2008, the Board issued Procedural Order No.5 setting out the schedule for interrogatories and the filing of intervenor evidence.

On March 7, 2008 the Board issued Procedural Order No. 6 which addressed an issue of confidentiality related to a System Model used by the Independent Electricity System Operator (“IESO”). On April 1, 2008, the Board issued its Decision and Order on Confidentiality Matters

On March 20, 2008 Pollution Probe filed a Notice of Motion with the Board seeking Orders responses to various interrogatories. These interrogatories are categorized in two types. The first type is “The Historical Information Interrogatories”, and the second type is “the Confidential Information Interrogatories”. The Board also noted that according to paragraph 3 of Procedural Order No. 5, Hydro One was directed to notify the Board and intervenors if it intends to refuse to answer an interrogatory, for various reasons, by the end of the third day following the filing of an interrogatory. The Board has received various notifications from Hydro One indicating that it has refused a number of interrogatories from several parties.

The Board issued Procedural Order No. 7 setting a Motion Day for April 3, 2008 to hear Pollution Probe’s Motion as well as motions from any other parties relating to interrogatory responses other parties were to file their Motion Records with the Board, and copies sent to all intervenors of record by noon of Tuesday, April 1, 2008. A combined Motion was received from the Ross Group and the Fallis Group.

The Board held the Motion Day Hearing on April 3, 2008 and issued on April 7, 2008, a Decision and Order on Motion directing ***Hydro One to respond to specific interrogatories.*** This requires adjustment to the timetable and the dates set out in Procedural Order No.5.

An updated list of Intervenors is attached as Appendix A to this Order. The schedule for the proceeding is attached as Appendix B to this Order.

Please be aware that further procedural orders may be issued from time to time.

THE BOARD ORDERS THAT:

1. Hydro One Networks Inc. shall file complete responses to each interrogatory listed in the Board's Decision and Order on Motion, dated April 7, with the Board and deliver such response to all Intervenors on or before **Thursday, April 10, 2008**.
2. Hydro One will inform the Board and intervenors regarding the status of the environmental assessment process no later than **Thursday, April 17, 2008**.
3. Intervenors and Board staff who wish to present evidence which is relevant to the proceeding, shall file that evidence with the Board and deliver it to Hydro One and the other Intervenors on or before **Friday, April 18, 2008**.
4. Any party (Intervenor, Board staff or Hydro One) who requires additional information related to an Intervenor's filed evidence, which is relevant to the proceeding, shall request it by written interrogatories filed with the Board and delivered to the parties on or before **Wednesday, April 23, 2008**.
5. Responses to the interrogatories shall be filed with the Board and delivered to Hydro One and the other Intervenors on or before **Wednesday, April 30, 2008**.
6. The evidentiary phase of the oral hearing will commence at 9:30 a.m. on **Thursday May 1, 2008 at a location to be determined**.
7. All parties filing material must provide these to the Board Secretary as ten hard copies and one electronic copy in searchable PDF format at boardsec@gov.on.ca, **by 4:45pm on the date indicated**, and copy all parties.

Interrogatory No. 1

Ref. Exh. B/T 6/S 5/Appendices 1,5,6

[abbreviation for Exhibit B/Tab 6/Schedule 5/Appendices 1, 5, and 6]

Issue Number: 1.3.

1.3. Issue: Is the project suitably chosen and sufficiently scalable so as to meet all reasonably possible future needs of significantly increased or reduced generation?

Request

Please provide a detailed description of how the added capacity in MW of the double-circuit 500 kV transmission line will be utilized to meet the additional capacity in MW of the two nuclear units (brought into service after being decommissioned), and the committed and projected wind generation in MW by fully reflecting the expected pattern of delivery from each type of generation during the peak demand seasons in summer and winter over a study period of 30 years commencing at the projected in-service date of December, 2011.
