Subject: Comments on draft Gas Distributor Access Rule

Attn: Kathi Litt

Response by Comsatec Inc.;

It is the opinion of Comsatec that rule 7.6.1 will give incentive to the end-use customer not to pay the marketer for the service or commodity prior to moving to an SSO.

When the customer is a large commercial or industrial end-user the incentive becomes greater as does the cost to the marketer in the case of non payment.

Comsatec would suggest that non residential customers should be required to finalise any disputes with their previous marketer.
