Legend

- Va Vendor A
- Vb Vendor B
- S System Gas
- C Consumer
- (C) The party initiating the original STR (i.e. the party that created the STR)
- X-> Y (Z) An STR submitted by Z, to change the supply for the customer from X to Y
- Switch-CP Switch pending - during contest period
- Switch-CPO Switch pending - contest period over but effective date has not yet arrived
- Switch-CPO (a) Switch pending - contest period over but effective date has not yet arrived - Vendor A was the winner
- Switch-CPO (b) Switch pending - contest period over but effective date has not yet arrived - Vendor B was the winner
- RTS Consumer requests "Return to System"

- Accept Accept incoming and existing STRs
- Reject Reject incoming STR
- No Change No change to the pending transaction is required by accepting the incoming transaction
- Implied TTR Pending transaction will be terminated by each party in their own systems
- N/A Transaction combination is not possible
- Contest Cancel Contest will be explicitly cancelled by the Distributor

- Notes:
- Dates used on the matrices are for illustrative purposes only. "Oct 1" is meant to represent any effective date that is prior to the pending effective date. "Dec 1" is meant to represent any effective date that is after the pending effective date.
 - The EBT Standard implies that Consumers may be permitted to submit allowed transactions while other STRs are pending

Example (A1):

Calendar Dt	Party	Action	Eff Date	Result
Aug 1	Vendor A	Enrol Request	Nov 1	Accepted - STR becomes "Pending"
Aug 2	Vendor A	Enrol Request	Oct 1	Rejected - Own enrol pending - use SA-NED to change effective date (if available)
