

NUMBERING FOR INTERROGATORY RESPONSES

The numbering system uses the letter “I” to refer to interrogatories answered as an applicant and the letter “J” to refer to interrogatories answered as an intervenor. Each party that is an applicant or has asked interrogatories in the proceeding has been assigned a number. If additional parties ask questions in the next round of interrogatories, those parties will be assigned a reference number.

Example of filing of responses to interrogatories to applicants:

As an example, consider Wirebury's interrogatories to Erie Thames.

For Erie Thames' response to Wirebury's interrogatories, each page of the response should be identified in the upper right-hand corner indicating a) the party responding and b) the party that filed the interrogatory as follows:

I6.12

For Erie Thames' response to question no. 2 in Wirebury's interrogatories to Erie Thames, the response should include a) an identifier of the party responding, the party that filed the interrogatory and the no. of the question, b) the question as stated in the interrogatory (this could be cut and pasted from the Board's web site) and c) the answer to the question.

I6.12.2 What criteria and connection options should the Board adopt when determining the most cost effective way to serve new customers?

Erie Thames answer to this question
