

1 **Ontario Energy Board (Board Staff) INTERROGATORY #13 (Prefiled Evidence)**

2

3 **Interrogatory**

4

5 At page 14, section 4.3, Networks puts forward the view that current distribution rates do
6 not reflect actual costs of service, and are not an appropriate criterion for service area
7 amendment decisions. Given that the level of rates in the future is unknown, how should
8 the Board approach applications where the preference of the customer is based largely on
9 the current rate differential?

10

11

12 **Response**

13

14 Networks noted in its prefiled evidence on page 2, lines 14 and 15 its position on this
15 issue.
