

1                                    **Wirebury Connections Inc. INTERROGATORY #5 (Hydro One IR)**

2  
3                                    **Interrogatory**

4  
5                                    Please explain how and to what degree, if at all, Hydro One assets would be stranded if a  
6                                    new (i.e. unattached or non-metered) customer is served by an embedded distributor  
7                                    connecting to and utilizing the same upstream network facilities that Hydro One would  
8                                    have used to serve the same customer?  
9

10  
11                                   **Response**

12  
13                                   See Networks' Exhibits J8-12-44, J8-10-4, J8-11-1 and the KEMA-Quantec report pp. 5-  
14                                   8. In addition to these considerations, Networks is unable to fully recover costs for use of  
15                                   its LV service and therefore cannot be indifferent.
