

1 **Wirebury Connections Inc. INTERROGATORY #9 (LDC IR)**

2
3 **Interrogatory**

4
5 Hydro One has suggested that network assets will be stranded if other distributors are
6 allowed to serve new (i.e. unattached or non-metered) customers in Hydro One’s current
7 area of service.

8
9 (a) What assets, if any, does your Company think would be stranded if new customers
10 were served by your Company, another LDC or an embedded distributor using the same
11 upstream network assets that Hydro One would use to serve the same customers? In
12 responding to this question, please assume that the customers are served through an
13 embedded distribution connection to Hydro One’s system rather than a contiguous
14 connection to your system.

15
16 (b) If the answer to (a) is there would be no stranding, please explain why.

17
18
19 **Response**

20
21 These interrogatories are not applicable to Networks.
