

HYDRO ONE INTERROGATORY #3

INTERROGATORY

What upstream cost should Wirebury pay to the host LDC as compensation for the connections noted in interrogatory 1? Why?

RESPONSE

As described in Wirebury's response to the LDC Coalition at Ex. J12, T15, S16, Wirebury would expect to be charged a wheeling rate by the host LDC. To the extent that the rate did not cover all of the capital costs associated with a connection, Wirebury expects a capital contribution would be paid to the host.
