

LDC COALITION INTERROGATORY #12

INTERROGATORY

Reference: Evidence of Wirebury Connections Inc., August 7, 2003, Paragraph 37

What is the "existing overlap of service areas" to which Wirebury refers?

RESPONSE

Wirebury is referring to the multiple instances of overlap between the incumbent LDCs and the building owners and property managers who are operating as unlicensed distributors in high rise and multi-unit properties. In addition, Wirebury believes there are areas, such as Markham, where the boundaries of the incumbent's license are not clearly defined creating operating overlaps with Hydro One Networks. In addition, there are a number of boundary and assets ownership disputes before the Board that may in practice be representative of overlapping service areas.
