

VERIDIAN CONNECTIONS INTERROGATORY #11

INTERROGATORY

Is it Wirebury's position that the "user pays" principle applies to embedded LDC customers in all cases?

RESPONSE

Wirebury's rate proposal is based on postage stamp rates that will be applied consistently to all customers in the same rate class regardless of their location within the company's service area. Where the approved rates do not cover the full cost of connecting a customer, Wirebury will seek capital contributions from the customer specific to that customer connection.
