Subject: smart meters

Hi. I have been reading about the implementation of the smart meters. I understand this is a new initiative but I would like to volunteer to participate in the programme if you are looking for volunteers. I want to cut my energy use and conserve as much as I can. I plan to take the one tonne challenge as well. Please let me know more about the programme in terms of installation of the meters.

Thank you for your time and attention,
Johana Beeharry
