FINAL ORDER

Collus Power Corporation (Collus Power) has along with 17 other electricity distribution companies, as members of Cornerstone Hydro Electric Concepts Association (CHEC), filed an application with the Ontario Energy Board (the Board) for a Final Order pre-approving its individual Conservation and Demand Management (CDM) Plan. The Board received the application on November 19, 2004 and assigned File No. RP-2004-0203 / EB-2004-0502 to this application.

A Notice of Application and Written Hearing was issued by the Board on December 7, 2004. Collus Power served and published the Notice as directed by the Board. The intervention period expired on January 22, 2005. There were no intervenors.

On May 31, 2004, the Minister of Energy granted approval to all distributors in Ontario to apply to the Board for an increase in their 2005 rates by the third installment of their incremental market adjusted revenue requirement (MARR). This approval is conditional on a commitment to reinvest an equivalent amount in CDM initiatives.

On October 5, 2004, the Board issued a Procedural Order (the Procedural Order) which addressed the opening of deferral accounts; the recovery of development expenses; the process for applying for plan approval; and the filing requirements for plan approval. Pursuant to the Procedural Order all electricity distribution companies, including Collus Power, received authorization to establish a deferral account.

The elements of Collus Power's CDM Plan are as follows: a customer survey program, an energy conservation website, an education and promotion program, a partnership and sponsorship program, a distribution system optimization and implementation program, a renewable energy demonstration project, a power factor correction program, a demand response initiative, a low income and partnership program, and a signal and street lighting efficiency program.

The total budget for the CDM plan is \$376,000.

The Board finds that the activities and programs proposed by Collus Power qualify as conservation and demand management activities and that the planned investments are eligible for tracking in the deferral account.

The Board approves the expenditure of \$376,000 for implementation of the CDM Plan.

The Board requires that Collus Power file with the Board quarterly and annual reports on the progress of the initiatives included in the approved CDM Plan. The annual reports will be subject to public review.

The Board understands that the approved CDM Plan and the associated budget allocation to the individual programs may be subject to modifications. The Board requires that all modifications be identified in the quarterly and annual reports. In addition, Collus Power shall apply to the Board for approval for modifications of spending above 20% of the approved budget.

IT IS ORDERED THAT:

1. Collus Power Corporation is granted a final approval of the Conservation and Demand Management Plan as submitted for the Board's review in the application received on November 19, 2004. This investment satisfies the Minister of Energy's condition of a financial commitment to reinvest the equivalent of one years incremental market adjusted revenue requirement in conservation and demand management. The approved total budget is \$376,000.
2. Collus Power Corporation shall file with the Board quarterly and annual reports on the progress of the initiatives within its conservation and demand management plan.
3. The quarterly reports shall be filed no later than 30 days after the end of each calendar quarter.
4. The annual reports shall be filed no later than March 31 of the following year. The annual reports shall be subject to public review. The annual report shall include a cost benefit analysis on the program included in the conservation and demand management plan.
5. Collus Power Corporation shall apply to the Board for approval if cumulative fund transfers among programs exceed 20% of the approved budget.

6. Collus Power Corporation may credit the costs of preparing its Conservation and Demand Management application and participation in the hearing including intervenor and Board costs against the amount required to be spent on its Conservation and Demand Management Plan budget.

DATED at Toronto, February 8, 2005.
