### **FINAL ORDER**

Grimsby Power Incorporated (GPI) has along with eight other electricity distribution companies as members of Niagara Erie Public Power Alliance (NEPPA), filed an application with the Ontario Energy Board (the Board) for a Final Order pre-approving its individual conservation and demand management (CDM) plan. The Board received the application on November 30, 2004 and assigned File No. RP-2004-0203 / EB-2004-0523 to this application.

A Notice of Application and Written Hearing was issued by the Board on December 9, 2004. GPI served and published the Notice as directed by the Board. The intervention period expired on January 16, 2005. There were no intervenors.

On May 31, 2004, the Minister of Energy granted approval to all distributors in Ontario to apply to the Board for an increase in their 2005 rates by the third installment of their

incremental market adjusted revenue requirement (MARR). This approval is conditional on a commitment to reinvest an equivalent amount in CDM initiatives.

On October 5, 2004, the Board issued a Procedural Order (the Procedural Order) which addressed the opening of deferral accounts; the recovery of development expenses; the process for applying for plan approval; and the filing requirements for plan approval. Pursuant to the Procedural Order all electricity distribution companies, including GPI, received authorization to establish a deferral account.

The elements of GPI's CDM Plan are; for residential and small commercial customers: a co-branded mass market program, a 'Smart' meters/pre-payment meters program and an energy audit program; for commercial, industrial and institutional customers: a 'Smart' meter/interval meter program and an energy audit and feasibility study program. The CDM Plan also includes a distribution loss reduction program.

The total budget for the CDM Plan is \$221,745. This amount is consistent with the third installment of its incremental MARR.

The Board finds that the activities and programs proposed by GPI qualify as conservation and demand management activities and that the planned investments are eligible for tracking in the deferral account.

The Board approves the expenditure of \$221,745 for implementation of the CDM Plan, which is consistent with the amount of the third installment of GPI's incremental MARR.

The Board requires that GPI file with the Board quarterly and annual reports on the progress of the initiatives included in the approved CDM Plan. The annual reports will be subject to public review.

The Board understands that the approved CDM Plan and the associated budget allocation to the individual programs may be subject to modifications. The Board

requires that all modifications be identified in the quarterly and annual reports. In addition, GPI shall apply to the Board for approval for modifications of spending above 20% of the approved budget.

**IT IS ORDERED THAT:**

1. Grimsby Power Incorporated is granted a final approval of the conservation and demand management plan as submitted for the Board's review in the application received on November 19, 2004. This investment satisfies the Minister of Energy's condition of a financial commitment to reinvest the equivalent of one year of incremental market adjusted revenue requirement in conservation and demand management. The approved total budget is \$221,745.
2. Grimsby Power Incorporated shall file with the Board quarterly and annual reports on the progress of the initiatives within its conservation and demand management plan.
3. The quarterly reports shall be filed no later than 30 days after the end of each calendar quarter.
4. The annual reports shall be filed no later than March 31 of the following year. The annual reports shall be subject to public review. The annual report shall include a cost benefit analysis on the program included in the conservation and demand management plan.
5. Grimsby Power Incorporated shall apply to the Board for approval if cumulative fund transfers among programs exceed 20% of the approved budget.
6. Grimsby Power Incorporated may credit the costs of preparing its conservation and demand management application and participation in the hearing including

intervenor and Board costs against the amount required to be spent on its conservation and demand management plan budget.

DATED at Toronto, February 18, 2005.

ONTARIO ENERGY BOARD
