FINAL ORDER

Terrace Bay Superior Wires Inc. has filed an application dated December 21, 2004 with the Ontario Energy Board for a Final Order pre-approving its Conservation and Demand Management (CDM) Plan. The Board assigned File No. RP-2004-0203 / EB-2004-0547 to this application.

A Notice of Application and Written Hearing was issued by the Board on January 10, 2004. Terrace Bay Superior Wires served and published the Notice as directed by the Board. The intervention period expired on January 28, 2004. There are no intervenors.

On May 31, 2004, the Minister of Energy granted approval to all distributors in Ontario to apply to the Board for an increase in their 2005 rates by the third installment of their incremental market adjusted revenue requirement (MARR). This approval is conditional on a commitment to reinvest an equivalent amount in CDM initiatives.

On October 5, 2004, the Board issued a Procedural Order (the Procedural Order) which addressed the opening of deferral accounts; the recovery of development expenses; the process for applying for plan approval; and the filing requirements for plan approval. Pursuant to the Procedural Order all electricity distribution companies, including Terrace Bay Superior Wires, received authorization to establish a deferral account.

The elements of Terrace Bay Superior Wires' CDM Plan include: research and development in conservation and demand management, implementing various energy efficient programs (such as lower wattage street lights, incentive for energy efficient products, promotion of compact fluorescent light bulbs, an energy efficient Christmas light exchange and an energy efficiency information distribution) and a distribution system optimization program.

The total budget for the CDM plan is approximately \$46,334. This amount is consistent with the third installment of its incremental MARR.

The Board finds that the activities and programs proposed by Terrace Bay Superior Wires qualify as conservation and demand management activities and that the planned investments are eligible for tracking in the deferral account.

The Board approves the expenditure of \$46,334 for implementation of the CDM Plan, which is consistent with the amount of the third installment of Terrace Bay Superior Wires' incremental MARR.

The Board requires that Terrace Bay Superior Wires file with the Board quarterly and annual reports on the progress of the initiatives included in the approved CDM Plan. The annual reports will be subject to public review.

The Board understands that the approved CDM Plan and the associated budget allocation to the individual programs may be subject to modifications. The Board

requires that all modifications be identified in the quarterly and annual reports. In addition, Terrace Bay Superior Wires shall apply to the Board for approval for modifications of spending above 20% of the approved budget.

IT IS ORDERED THAT:

1. Terrace Bay Superior Wires Inc. is granted a final approval of the Conservation and Demand Management Plan as submitted for the Board's review in the application dated December 21, 2004. This investment satisfies the Minister of Energy's condition of a financial commitment to reinvest the equivalent of one year of incremental market adjusted revenue requirement in conservation and demand management. The approved total budget is \$46,334.
2. Terrace Bay Superior Wires Inc. shall file with the Board quarterly and annual reports on the progress of the initiatives within its Conservation and Demand Management Plan.
3. The quarterly reports shall be filed no later than 30 days after the end of each calendar quarter.
4. The annual reports shall be filed no later than March 31 of the following year. The annual reports shall be subject to public review. The annual report shall include a cost benefit analysis on the program included in the Conservation and Demand Management Plan.
5. Terrace Bay Superior Wires Inc. shall apply to the Board for approval if cumulative fund transfers among programs exceed 20% of the approved budget.

6. Terrace Bay Superior Wires Inc. may credit the costs of preparing its Conservation and Demand Management application and participation in the hearing including intervenor and Board costs against the amount required to be spent on its Conservation and Demand Management Plan budget.

DATED at Toronto, February 17, 2005

ONTARIO ENERGY BOARD

Peter H. O'Dell
