Ontario Energy Board Commission de l'énergie de l'Ontario

EB-2007-0595

IN THE MATTER OF the Ontario Energy Board Act, 1998, S.O. 1998, c.15 (Schedule B);

AND IN THE MATTER OF an application by Canadian Niagara Power Inc. – Port Colborne for an order or orders approving or fixing just and reasonable distribution rates and other charges for 2007.

BEFORE:

Paul Sommerville Presiding Member

Paul Vlahos Member

Ken Quesnelle Member

RATE ORDER

On January 26, 2007, Canadian Niagara Power Inc. – Port Colborne ("CNPI – Port Colborne") filed an application with the Ontario Energy Board (the "Board") under section 78 of the Ontario Energy Board Act, 1998; S.O. c.15, Schedule B, for an order or orders approving or fixing just and reasonable rates for the distribution of electricity effective May 1, 2007. The Board assigned file number EB-2007-0595 to the application.

In addition to the automatic price index adjustment mechanism, CNPI – Port Colborne requested recovery of \$253,094 for costs that it incurred as a result of the damage inflicted to the distribution system of Port Colborne by an October 2006 storm. The request was made on the basis of the Z Factor provisions in the December 20, 2006 Report of the Board on Cost of Capital and 2nd Generation Incentive Regulation for Ontario's Electricity Distributors (the "Board Report").

In addition to CNPI – Port Colborne, three other Ontario electricity distributors also made applications to the Board for recovery of costs incurred due to extraordinary events, namely severe storms, which inflicted significant damage to their respective distribution systems. All four distributors requested recovery of these costs through the Z Factor recovery mechanism outlined in the Board Report.

On April 30, 2007 the Board issued decisions for each of the applicants, establishing new distribution rates reflecting only the automatic price index adjustment. The Board set the approved distribution rates as interim pending a more detailed review of the applicants' Z Factor claims.

In order to expedite the review of issues related to the storm damage cost claims, the Board convened a combined oral hearing, which reviewed the storm damage cost claims for the four applicants. The oral hearing took place on June 11, 2007 at the Board's offices in Toronto.

On July 31, 2007 the Board released its combined Decision with Reasons ("Decision"). The Board directed each of the applicants to file with the Board and all intervenors of record, revised rate riders reflecting the Board's findings.

CNPI – Port Colborne filed its revised rate riders with the Board and all intervenors on August 2, 2007. On August 3, 2007, CNPI – Port Colborne filed an amended filing correcting certain typographical errors in the August 2, 2007 filing. The revised information reflected changes to CNPI – Port Colborne's original application as required by the Decision.

It its Decision, the Board provided five days for intervenors to comment on the refiling. No comments were received by the Board.

Upon reviewing the materials as submitted by CNPI – Port Colborne, the Board finds it appropriate to issue the final 2007 rate order effective September 1, 2007, reflecting the Board's Decision. The Board finds the rates and charges in the

Tariff of Rates and Charges attached as Appendix "A" to this order to be just and reasonable.

THE BOARD ORDERS THAT:

- 1. The Tariff of Rates and Charges for CNPI-Port Colborne attached as Appendix "A" to this order is approved on a final basis except for the standby rates which remain interim.
- 2. CNPI Port Colborne shall notify its customers of the rate changes no later than with the first bill reflecting the new rates.

ISSUED at Toronto, August 10, 2007

ONTARIO ENERGY BOARD

Kirsten Walli Board Secretary

APPENDIX A

TARIFF OF RATES AND CHARGES

Canadian Niagara Power – Port Colborne

RATE ORDER

BOARD FILE NO. EB-2007-0595

August 10, 2007

Canadian Niagara Power – Port Colborne TARIFF OF RATES AND CHARGES Effective September 1, 2007

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2007-0595

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Codes, Guidelines or Orders of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.
No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code, Guideline or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

- This schedule does not contain any rates and charges relating to the electricity commodity (e.g. the Regulated Price Plan).

EFFECTIVE DATES

DISTRIBUTION RATES - September 1, 2007 for all consumption or deemed consumption services used on or after that date. SPECIFIC SERVICE CHARGES - September 1, 2007 for all charges incurred by customers on or after that date. LOSS FACTOR ADJUSTMENT – September 1, 2007 unless the distributor is not capable of prorating changed loss factors jointly with distribution rates. In that case, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

SERVICE CLASSIFICATIONS

Residential

The Residential Class (Regular) refers to a service taking electricity normally at 750 volts or less where the electricity is used for domestic and household purposes in a single family unit. A single family unit being a permanent structure located on a single parcel of land and approved by a civic authority as a dwelling and occupied for that purpose by a single customer.

Residential rates are also applied to apartment buildings with 6 units or less that are bulk metered. Apartment buildings with more than 6 units that are bulk metered are deemed to be General Service.

General Service Less Than 50 kW

This classification refers to the supply of electrical energy to single commercial or industrial customer and whose average peak demand is (or is forecasted to be) less than 50 kW. Single commercial or industrial customers are interpreted as a structure or structures on a single parcel of land occupied by one customer. An apartment building with more than 6 units that is bulk metered and has an average peak demand less than 50 kW is deemed to be General Service less than 50 kW. The common area of a separately metered apartment building having a demand less than 50 kW is also deemed to be General Service less than 50 kW.

General Service 50 to 4,999 kW

This classification refers to the supply of electrical energy to single commercial or industrial customer and whose average peak demand is (or is forecasted to be) equal to or greater than 50 kW but less than 5000 kW. Single commercial or industrial customers are interpreted as a structure or structures on a single parcel of land occupied by one customer.

Unmetered Scattered Load

This classification refers to the supply of electrical service to a customer that is deemed to have a constant load over a billing period, normally with minimum electrical consumption and the consumption is unmetered. Energy consumption is based on connected wattage and calculated hours of use. Examples of unmetered scattered load are cable television amplifiers, billboards, area lighting.

Standby Power

The Standby subclass charge is applied to a customer with load displacement facilities behind its meter but is dependent on Canadian Niagara Power Inc. to supply a minimum amount of electricity in the event the customer's own facilities are out of service. The minimum amount of supply that Canadian Niagara Power Inc. must supply is a contracted amount agreed upon between the customer and Canadian Niagara Power Inc.

Sentinel Lighting

This classification refers to all services required to supply sentinel lighting equipment.

Street Lighting

This classification refers to the supply of electrical service for roadway lighting. Energy consumption is based on connected wattage and calculated hours of use. Customers are usually a Municipality, Region or the Ministry of Transportation.
