NOTICE OF APPLICATION AND HEARING FOR AN ELECTRICITY DISTRIBUTION RATE CHANGE

Great Lakes Power Limited

Great Lakes Power Limited has filed an application with the Ontario Energy Board, received on August 31, 2007, under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15 (Schedule B), seeking approval for changes to the rates that Great Lakes Power Limited charges for electricity distribution, to be made effective September 1, 2007.

In addition, Great Lakes Power Limited has requested the Ontario Energy Board to make the current distribution rates interim as of September 1, 2007 and to authorize the establishment of a deferral account to record revenue requirement deficiencies incurred from September 1, 2007 until new distribution rates are implemented.

The Board has assigned the application file number EB-2007-0744. The Board's decision on this application may have an effect on all of Great Lakes Power Limited's customers, some of whom may be reclassified into a different rate structure.

Any change to Great Lakes Power Limited's distribution rates or to the reclassification of its customers will also cause Great Lakes Power Limited's delivery charges to change. Delivery charges are one of four regular items on residential and general service customers' electric bills and vary depending on the amount of electricity consumed.

Great Lakes Power Limited is seeking approval of \$17,576,700 as the annual revenue it requires to provide electricity distribution. In addition, Great Lakes Power Limited will be reducing the number of rate classes from six to four in order to implement the recently introduced Electricity Act Regulations 445/07 and 446/07. Great Lakes Power Limited indicates that if the application is approved as filed the following impacts are expected. A residential customer consuming 1,000 kWh per month would experience an approximate increase of 2.5% in the electricity bill. A seasonal customer consuming an

average of 250 kWh a month would experience an approximate increase of 10.0% in the electricity bill. A small general service customer consuming 3,000 kWh per month and having a monthly demand of 50 kW or lower would see an approximate decrease of 8.6% in the electricity bill.
