

EB-2007-0859

IN THE MATTER OF the *Ontario Energy Board Act*,
1998, S.O. 1998, c.15 (Schedule B);

AND IN THE MATTER OF an application by Haldimand
County Hydro Inc. for an order or orders approving or
fixing just and reasonable distribution rates and other
charges, to be effective May 1, 2008.

BEFORE: Paul Vlahos
Presiding Member

Paul Sommerville
Member

DECISION

Introduction

Haldimand County Hydro Inc. is a licensed distributor of electricity providing service to consumers within its licensed service area. Haldimand County Hydro Inc. filed an application with the Ontario Energy Board (the “Board”) for an order or orders approving or fixing just and reasonable rates for the distribution of electricity and other charges, to be effective May 1, 2008.

Haldimand County Hydro Inc. is one of over 80 electricity distributors in Ontario that are regulated by the Board. In 2006, the Board announced the establishment of a multi-year electricity distribution rate-setting plan for the years 2007-2010. As part of the plan, Haldimand County Hydro Inc. is one of the electricity distributors to have its rates adjusted for 2008 on the basis of the 2nd Generation Incentive Rate Mechanism (“IRM”) process.

To streamline the process for the approval of distribution rates and charges for distributors, the Board issued its *Report of the Board on Cost of Capital and 2nd Generation Incentive Regulation for Ontario's Electricity Distributors* (the "Report") on December 20, 2006. Among other things, the Report contained the relevant guidelines for 2008 rate adjustments (the "Guidelines") for distributors applying for rate adjustments pursuant to the IRM process.

Notice of Haldimand County Hydro Inc.'s rate application was given through newspaper publication in Haldimand County Hydro Inc.'s service area advising of the availability of the rate application and advising how interested parties may intervene in the proceeding or comment on the application. There were no intervention requests and no comments were received. The Board proceeded by way of a written hearing. Board staff participated actively in the proceeding.

While the Board has considered the entire record in this rate application, it has made reference only to such evidence as is necessary to provide context to its findings.

Price Cap Index Adjustment

Haldimand County Hydro Inc.'s rate application was filed on the basis of the Guidelines. In fixing new rates and charges for Haldimand County Hydro Inc., the Board has applied the policies described in the Report.

As outlined in the Report, distribution rates under the 2nd Generation IRM are to be adjusted by a price escalator less a productivity factor (X-factor) of 1.0%. Based on the final 2007 data published by Statistics Canada, the Board has established the price escalator to be 2.1%. The resulting price cap index adjustment is therefore 1.1%. The rate model was adjusted to reflect the newly calculated price cap adjustment. This price cap index adjustment applies to distribution rates (fixed and variable charges) uniformly across all customer class. An adjustment for the transition to a common deemed capital structure of 60% debt and 40% equity was also effected. In addition, a change in the federal income tax rate effective January 1, 2008 was also incorporated into the rate model and reflected in distribution rates.

The Board also considered the reduction in Ontario capital tax and the increase in capital cost allowance (CCA) applicable to certain buildings and computers acquired

after March 2007. The Board has decided that adjustments related to these items are not required, either because the changes are not of general application, or because they do not appear to be material.

The price cap index adjustment does not apply to the following components of the rates:

- the specific service charges;
- the smart meter rate adder (an amount in the fixed components of the rates associated with smart meter cost recovery); and
- any continuing rate riders.

Accordingly the Board is providing Haldimand County Hydro Inc. with a rate model (spreadsheet) that reflects the price cap adjustments described above. Haldimand County Hydro Inc. is required to review the rate model (spreadsheet) and to confirm its completeness and accuracy with the Board at the time it files its Draft Rate Order. Haldimand County Hydro Inc. shall file with the Board a Draft Rate Order attaching the proposed Tariff of Rates and Charges which will reflect the Board's price cap adjustments as verified by Haldimand County Hydro Inc. Haldimand County Hydro Inc. shall also provide the rate model (spreadsheet) that underpins the Tariff of Rates and Charges. Any changes to the Board's rate model (spreadsheet) shall be clearly identified and explained.

Rate Riders

When the Board approved new rates for distributors for 2006, it also approved the recovery of regulatory asset balances on a final basis. The Board approved rate riders to facilitate the recovery of the approved balances over the two remaining years of the four-year recovery period mandated by the Minister of Energy (i.e. May 1, 2004 to April 30, 2008). The rate rider(s) associated with the recovery of regulatory assets will cease on May 1, 2008 and shall be removed from the Tariff of Rates and Charges, unless a previous Board decision authorized the continuation of such riders beyond April 30, 2008. No such authorization has been previously provided by the Board for Haldimand County Hydro Inc. The final balance in account 1590 cannot be confirmed until after the current recovery period has expired, i.e. after April 30, 2008. Once the residual balance in deferral account 1590 is finalized, the residual balance will be disposed in a future proceeding.

Smart Meter Rate Adder

Haldimand County Hydro Inc. requested the continuation of the smart meter rate adder previously approved by the Board in order to provide funding for possible future implementation of smart meter costs and to minimize future rate impacts. The Board-approved rate adder for Haldimand County Hydro Inc. of \$0.26 per month per metered customer shall continue. Haldimand County Hydro Inc.'s variance accounts for smart meter program implementation costs, previously authorized by the Board, shall also be continued.

Retail Transmission Service Rates

On October 17, 2007, the Board issued its EB-2007-0759 Rate Order setting new Uniform Transmission Rates for Ontario transmitters, effective November 1, 2007. The Board approved a decrease of 18% to the wholesale transmission network rate, a decrease of 28% to the wholesale transmission line connection rate, and an increase of 7% to the wholesale transformation connection rate. The combined change in the wholesale transmission line connection and transformation connection rates is a reduction to the connection rate of 5%.

On October 29, 2007, the Board issued a letter to all electricity distributors directing them to propose an adjustment to their retail transmission service (RTS) rates to reflect the new Uniform Transmission Rates for Ontario transmitters effective November 1, 2007. The objective of resetting the rates was to minimize the prospective balance in variance accounts 1584 and 1586 and also to mitigate intergenerational inequities.

Haldimand County Hydro Inc. proposed to reduce its RTS – Network Service Rates by 15% and its RTS – Line and Transformation Connection Service Rates by 3% for all its rate classes. These adjustments are based on a comparison of RTS revenue under existing rates and adjusted wholesale transmission costs. No changes were assumed regarding the level of transmission related charges payable to Hydro One Networks Inc. (HONI) on the grounds that Haldimand County Hydro Inc. is partially embedded within Hydro One Distribution and that the RTS rates for Hydro One Distribution have not yet changed.

In its submission, Board staff questioned whether the Board should consider further adjustments to the RTS that would assume that the wholesale transmission charges

payable to HONI would change by the same percentage as the wholesale transmission charges payable to the IESO. In its reply submission, Haldimand County Hydro Inc. recalculated the wholesale transmission costs payable to HONI assuming the same percentage changes in the Uniform Transmission Rates. The results of the revised calculations were a reduction of 17% for the RTS – Network Service Rates and a reduction of 4% for the RTS – Line and Transformation Connection Service Rates for all its rate classes.

The Board notes that the RTS rates of Hydro One Distribution are currently under review by the Board as part that utility's 2008 distribution rate application. Hydro One Distribution has proposed changes to its existing RTS rates as a result of the changes in the Uniform Transmission Rates for Ontario transmitters effective November 1, 2007. While there is uncertainty regarding the exact quantum and timing of this upcoming rate change the Board finds that, in order to minimize the prospective balance in variance accounts 1584 and 1586 and mitigate intergenerational inequities, wholly embedded or partially embedded distributors should adjust their RTS rates to reflect the proposed changes in the RTS rates charged by their host distributor. Since the proposed changes in the RTS rates of Hydro One Distribution are similar to the approved changes in the Uniform Transmission Rates for Ontario transmitters, the Board directs Haldimand County Hydro Inc. to reduce its RTS – Network Service Rates by 17% and to reduce its RTS – Line and Transformation connection Service Rates by 4%. Haldimand County Hydro Inc. is required to include these changes in its rate model (spreadsheet) to be filed with the Board.

Implementation

Haldimand County Hydro Inc.'s new distribution rates are effective May 1, 2008. The Board directs that:

1. Haldimand County Hydro Inc. shall file with the Board a Draft Rate Order attaching the proposed Tariff of Rates and Charges and the supporting rate model (spreadsheet) within seven (7) days of the date of this Decision. The proposed Tariff of Rates and Charges shall be filed in a Word format. The adjusted rate model shall be filed in an Excel format.

DATED at Toronto, March 18, 2008.
