Re: Process for Establishing 2006 Electricity Distribution Rates - Potential Issues

The Power Workers' Union appreciates the opportunity to provide input to the Ontario Energy Board's informal consultation on potential issues related to a process for establishing 2006 distribution rates.

Attached please find the PWU's written submission prepared on our behalf by Judy Kwik, Senior Consultant with Elenchus Research Associates. We hope the Board will find the input helpful.

The PWU looks forward to actively participating in the remainder of the Board's consultation on 2006 distribution rates.

Sincerely,

Don MacKinnon,
President
