

# Estimated Bill Impacts

February 19, 2010

The following estimated bills are provided for information purposes only. They are not intended to represent actual bills but rather to provide an estimate for comparison between utility service areas. The values in the Electricity column reflect the Regulated Price Plan (RPP) rates that were in effect at that time. Because of rounding, amounts in the sub-total and total columns may be off by one cent.

The numbers in the chart have been calculated using the following data and assumptions:

- shows estimated total bill impacts for those utilities with 2009 distribution rates announced (May 1st unless otherwise noted)
- a residential consumer using 1,000 kilowatt hours per month
- loss factor adjustment has been applied
- a consumer who is on the RPP, purchasing their electricity through their utility
