To: All Licensed Electricity Distributors

Re: Process for 2010 Incentive Regulation Distribution Rate Applications

The Ontario Energy Board regulates electricity distribution companies using a combination of annual incentive rate mechanism adjustments and periodic cost of service reviews.

Electricity distributors that have completed a cost of service application for the annual rate adjustment date of May 1, 2008 and beyond are eligible to file a 3rd Generation IRM rate application ("IRM3"). Electricity distributors that have not re-based but that have completed a 2006 EDR application for the annual rate adjustment date of May 1, 2006 and concurrent 2nd Generation IRM rate applications are eligible to file a 2010 2nd Generation IRM ("IRM2").

The proposed filing dates intend to stagger applications according to their complexity. Those applications requiring greater length of time to review are scheduled to be filed first.

Schedule for Filings

- Group 1 A straightforward **IRM2** application with **no additional complexities** must file on **December 2, 2009**.
- Group 2 A straightforward **IRM3** application with **no additional complexities** must file on **November 4, 2009**.
- Group 3 An IRM2 or IRM3 application that includes the implementation of an LRAM/SSM rate rider and/or the continuation of a directive from a previous Board Decision, such as a **Revenue Cost Ratio Adjustment**, disposition of select deferral/variance accounts (subject to a Report of the Board to be issued shortly) or the continuation of a rate harmonization implementation must file on Wednesday October 21, 2009.

- Group 4 An **IRM2 or IRM3** application that possibly includes the components in Group 3 but also includes the application a **Z Factor** must file on Wednesday **September 30, 2009**.
- Group 5 An **IRM3** application that possibly includes the components in Groups 2 and 3 but also includes an **Incremental Capital Module** must file on Wednesday **September 16, 2010**.

Chapter 3 Filing requirements for incentive regulation mechanisms for annual rate adjustments

The Board will be issuing amendments to Chapter 3 of the Filing Requirements for Transmission and Distribution Applications shortly. The changes to the filing requirements consolidate and clarify the various filing requirements issued in the past few years.

2010 2nd and 3rd Generation Rate Generators

Microsoft Excel based Rate Generators and Supplemental Filing Modules supporting the 2010 IRM Distribution Rate applications will be made available mid to late July to those applying for annual rate adjustments. Details including filing requirements and FAQ's will be provided when the filing models are available for downloading.

Web Cast

A web cast will be held in mid August for distributors that are filing IRM rate applications. Details on the web cast including instructions on how to register will be announced mid July.

Application Numbers (EB assignment)

The Board has pre-assigned file numbers for the 2nd and 3rd Generation 2010 IRM applications. Please refer to this number in all future correspondence to the Board regarding 2nd or 3rd Generation 2010 IRM applications.

Yours truly,

Original Signed By

John Pickernell Assistant Board Secretary
