FORT FRANCES POWER CORPORATION

July 16, 2008

Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
P.O. Box 2319
27th Floor
2300 Yonge Street
TORONTO, Ontario
M4P 1E4

Dear Ms. Walli,

**Re: Multi-year Electricity Distribution Rate Setting Plan
Final Selection of Electricity Distributors for Rebasing in 2010 and 2011 Board
File No.: EB-2009-0028**

Fort Frances Power Corporation Request To Defer Rate Rebasing

I am writing this letter on behalf of the Fort Frances Power Corporation to seek Board approval to be removed from the selection list of electricity distributors for rate rebasing in 2010 and be placed on the selection list of electricity distributors for rate rebasing in 2011.

Fort Frances Power Corporation staff is currently overwhelmed with implementing the multitude of new and ongoing initiatives including the installation of smart meters and associated preparation for time-of-use rates, accommodating the requirements of the Green Energy and Green Economy Act including the launch of the Feed In Tariff and Micro-Feed In Tariff Program, conservation and demand management and several other significant initiatives that considerable resources need to be devoted to.

The Fort Frances Power Corporation will be completing several major initiatives over the next six months at which time sufficient resources can be allocated towards our rate rebasing submission. Deferring our rate rebasing to 2011 will greatly enhance the quality and timelines of our submission(s).

Should you require any additional information or clarification, please do not hesitate to contact me. On behalf of the Fort Frances Power Corporation I thank you for your consideration.

Sincerely,
FORT FRANCES POWER CORPORATION
