To: All Licensed Electricity Distributors

**Re: 2012 IRM Process**

Today, the Board has issued an updated version of the following Microsoft Excel workbook for distributors to complete as part of their 2012 electricity IRM applications. Distributors will find the model under the "Update" section on the Board's 2012 Electricity Distribution Rate Applications webpage at <http://www.oeb.gov.on.ca/OEB/Industry>.

- 2012 IRM Rate Generator (Version 1.1)
  - Updates were made to Sheet "9. Cont. Sched. Def\_Var". Missing formulae were inserted into cells in rows 46 and 47 associated with columns BJ, BK, BO, BV, and BX.

Please note that the change noted above does not affect the 2012 proposed Tariff of Rates and charges. The change was associated with deferral and variance accounts that are to be reported on a "memo basis" only. If you have already populated the 2012 IRM rate generator previously posted on the Board's website, it is not expected that you re-populate this newer version before filing.

Yours truly
