

Dunsky Presentation to AEE

- Highlights of presentation by Dunsky Expertise en Énergie Consulting (July 9, 2008) to Agence de l'efficacité énergétique (AEE - also known as Quebec Agency for Energy Efficiency)
- AEE promotes energy efficiency in the use of all fuels in every sector
- AEE establishes 3-year plans for energy efficiency and new energy technologies, and oversees the implementation and follow-up of those plans

Key Recommendations to the AEE

- The AEE should use the Societal Cost Test (SCT) to screen at the DSM portfolio level: $B/C \geq 1$
- SCT should be used at the measure and program levels as an indicator for information purposes, but not as a screen
- The Program Administrator Test should be used as a secondary test at the portfolio level
