**Re: Multi-year Electricity Distribution Rate Setting Plan  
Final Selection of Electricity Distributors for Rebasing in 2010 and 2011  
Board File No.: EB-2009-0028**

On January 29 2009, the Board issued for comment the lists of electricity distributors who have indicated they propose to file cost of service applications in 2010 and 2011. The selection of these distributors was as identified in Appendices A and B in the January 29 letter.

The Board received comments from a number of distributors requesting that they be moved from 2010 to 2011 or vice versa for rebasing. These comments have been posted on the Board's website.

After factoring the comments received into its analysis, the Board has adjusted the lists. The final lists of distributors who have indicated they plan for their rates to be rebased in 2010 and 2011 are set out in Appendices A and B respectively to this letter.

Distributors are reminded that, to ensure appropriately current allocation of costs to customer classes, the filing guidelines require an updated cost allocation study as part of the distributor's application.

For the information of distributors whose costs are to be rebased in 2010, the Board expects to issue refinements to the filing guidelines for *Filing Requirements for Transmission and Distribution Applications* by early June. The refinements will reflect recent experience with the cost of service applications and will be in an effort to clarify what evidence is required to support the application. Applicants are encouraged to file applications for 2010 as soon as possible, and no later than August 28, 2009 for rates to become effective May 1, 2010.

Yours truly,

*Original signed by*

Kirsten Walli  
Board Secretary
