Dear Ms. Walli,

Re: Addendum to Hydro 2000's Conservation and Demand Management Strategy Board File # EB-2002-0542

As requested by the Board, Hydro 2000 Inc. is submitting an amendment to its previously submitted Conservation and Demand Management (CDM) Strategy filed to the Ontario Energy Board on November 1, 2010.

The addendum includes estimated prospective budgets to implement and operate the programs/initiatives of the OPA-Contracted Province-Wide Programs detailed in the original CDM Strategy submission.

If you have any questions or concerns, please do not hesitate to contact Rene Beaulne at (613) 679-4093 or email aphydro@hawk.igs.net.

Respectfully Submitted,

A handwritten signature in black ink that reads "Rene Beaulne". The signature is written in a cursive, flowing style.

Rene Beaulne
Manager/CEO
Hydro 2000 Inc.

**Addendum to Hydro 2000's Conservation and Demand Management Strategy
Amended June 8, 2011**

Background

On November 1, 2010, Hydro 2000 submitted their Conservation and Demand Management (CDM) Strategy to the Ontario Energy Board (OEB). Hydro 2000 utilized the Ontario Power Authority's (OPA) Resource Planning Tool to forecast reductions in Peak Provincial Electricity Demand and Electricity Consumption. Hydro 2000 also took into consideration our service territory's residential profile and past CDM program results when analyzing the results of the Resource Planning Tool.

The OEB issued its Decision and Order for the 2011-2014 Conservation and Demand Management Targets on November 12, 2010. Hydro 2000's CDM target for total reduction in Peak Provincial Electricity Demand was reduced from 0.20 MW to 0.19 MW and our target for total reduction in Electricity Consumption increased from 1.00 GWH to 1.04 GWH.

On November 11, 2010 Hydro 2000 received a letter from the OEB requesting an addendum to the submitted CDM strategy that was to include estimated, prospective budgets for planned OPA-Contracted Province-Wide CDM programs and Board Approved CDM programs. The Board letter stipulated that the addendum was to be filed 21 days after the finalization of the OPA's funding formula. The letter also stated that budgets associated with the OPA's Low Income program did not need to be included in the addendum.

Hydro 2000 received from the OPA their Program Administrative Budget for the four year period of 2011-2014. On February 18th the Board issued a notice to all licensed electricity distributors, which stated that there are five funding components that form the complete funding envelope for the OPA programs. The five funding components are:

- Program Administrator Budget (PAB)
- Capability Building Funding (CBF)
- Participant Based Funding (PBF)
- Participant (or customer) Incentives (PI or CI)
- Cost Efficiency Funding (CEI)

The OEB stated that Hydro 2000's addendum should include projected budgets for all of the funding components noted above except for Cost Efficiency Funding.

On May 20th the Board confirmed that the OPA funding formula has been finalized and is now available to all distributors. The Board requested that distributors file the required addendum no later than June 13, 2011.

Estimated Prospective Budget

To respond to the directive provided by the Board, Hydro 2000 utilized the best available information to reach the estimated preliminary budget for Residential, Commercial & Institutional and Industrial programs. As per the Board file number EB-2010-0215 no estimated funding amounts were required for the Low Income program.

Hydro 2000 utilized the Resource Planning Tool provided by the OPA to assist with the development of prospective budgets for the various programs and initiatives. Adjustments were made to the budgets based on territory specific information and past knowledge of CDM program participation.

The preliminary budget outlined in this document covers four of the five funding components outlined in the Board's February 18th filing. A budget for CEI was not included as this will be an amount rewarded to LDCs at the end of the program's life for implementing their OPA Programs in a cost efficient manner.

The following table provides a breakdown of the estimated prospective budgets for the OPA Contracted Province-Wide programs:

OPA Contracted Province-Wide Programs	Estimated Prospective Budget 2011 -2014
Residential Program	\$117,688
Commercial and Institutional Program	\$347,792
Industrial Program	\$68,462
Low Income Program	N/A
Total Budget	\$534,122

Limitations/Constraints

The estimated prospective budgets are based on meeting the required MW and GWH targets for Hydro 2000 Inc. The final budget numbers might be higher or lower than the estimated budget numbers depending on the following considerations:

- Technologies and measures to be implemented
- Details of program design and the actual cost of delivering them
- The ability to meet typical costs in Hydro 2000's service area
- The possible need for the programs to exceed energy targets in order to meet demand targets (or vice versa)

Hydro 2000 Inc. will report on progress towards budget and the assigned CDM targets in its annual report submissions to the Board.
