To: All Licensed Electricity Distributors

**Re: Request for Information
Electricity Conservation and Demand Management Targets
Board File No. EB-2010-0216**

The Ontario Energy Board (the “Board”) issued for comment the proposed Conservation and Demand Management Targets (“CDM Targets”) for Electricity Distributors on June 22, 2010. Written comments from stakeholders were received by the July 7, 2010 deadline.

Within the written comments, several distributors raised potential issues regarding embedded load. The distributors stated that embedded load has not been reflected in the Board’s Yearbook statistics and/or Independent Electricity System Operator (“IESO”) hourly demand data. In order to determine whether appropriate adjustments to the CDM Targets are required, the Board requests that those distributors with potential embedded load issues provide the detailed data listed below for the years 2008 and 2009:

- details of embedded load;
- name of the embedded distributor involved;
- specific adjustments requested; and,
- hourly profiles of the embedded load, if available.

The distributors shall file this information with the Board by **October 8, 2010**.

Please be advised that the Board will share this information with the Ontario Power Authority and Hydro One Networks Inc.

Yours truly,

Original signed by

Kirsten Walli
Board Secretary
