

LV Workshop Agreement October 7, 2013

Component	In/Out	If different than current, why?
HVDS High	Out	Performs function similar to network transformation
HVDS Low	In (45% only)	Performs functions similar to municipal substation owned by Tx connected distributor and network transformation. Ratio of LVDS and HVDS-low charges.
LVDS	In	
Meter Charge	In	
Service Charge	Out	See Econalysis' slide deck. Treatment is not obvious, therefore exclude costs.
Specific ST Lines Charge	In	
Specific Primary Lines Charge	In	
Common ST Lines Charge	Out	Some costs should be included but no data available to support other than exclusion
