

**Work Group Meeting
Unmetered Load Policy Review
December 10, 2012**

EB-2012-0383

Summary of Board Report EB-2010-0219

Michael Roger

EB-2010-0219

- Limited Review of Cost Allocation Issues
- More comprehensive review in 2 to 3 years:
 - Smart meter data
 - Better cost allocators

Issues Reviewed

- microFIT
- Cost Allocation Methodology Refinements:
 - Cost allocation to UL
 - Treatment of TOA
 - Allocation of Miscellaneous Revenues
 - Weighting Factors for Services and billing costs
 - Allocation of host distributors costs to embedded distributors
- Allocation of costs to Load displacement generation

Issues Reviewed (cont.)

- Refine 3 widest R/C ratio:
 - General Service > 50 kW
 - Street Lighting
 - Sentinel Lighting
- Accounting changes resulting from IFRS

OEB Recommendations (UL)

- Separate customer class for USL
- Need to clarify some aspects of the terminology surrounding the USL and Street Lighting classes
- Weighting factors for Services and Billing costs based on each distributor's specific circumstances
- Sentinel Light R/C ratio 0.8 to 1.2
- Street Light R/C ratio unchanged until further consultation
