¹ Includes consumers with a retailer not currently eligible for RPP but have the potential to be – Includes only active meters to reflect 'consumers' ie. does not include meters with status OFF or meters not assigned to an active account

² Installed smart meters include all meters installed regardless of status ie. meter could be OFF – which is why installed meter number is higher than number of eligible RPP consumers

³ Percentages were calculated by adding OFF status meters to total number of consumers so as not to inaccurately report over 100% of meters installed
