

## Natural Gas Bills are Changing for EPCOR Customers

The Ontario Energy Board (OEB) has approved new natural gas prices for EPCOR Natural Gas Limited Partnership's (EPCOR) customers in its [Aylmer](#) and [Southern Bruce](#) service areas to take effect July 1, 2026. EPCOR's residential customers using a typical amount of natural gas can expect an average annual bill increase of \$2.01 for the Aylmer service area and decrease of \$23.41 for the Southern Bruce service area.

*Table 1 – Total Annual Bill Impact*

Service Area and Typical Annual Usage for a Residential Customer	EPCOR Aylmer 2, 065 m <sup>3</sup>	EPCOR Southern Bruce 1, 424 m <sup>3</sup>
Total Annual Bill – Current	\$956.61	\$1,260.00
– Beginning July 1, 2026	\$958.62	\$1,236.60
Total Annual Bill Impact	\$2.01	(\$23.41)
– Percentage Change	0.2%	(1.9%)

*\*Bill impacts will vary depending on how much natural gas individual customers use. Natural gas use is generally lowest during the summer months.*

## BACKGROUND

### Southern Bruce

Natural gas prices have been trending lower since early 2026, mainly due to strong supply levels. While colder winter weather caused short-term price increases, demand eased as temperatures warmed. High storage levels continue to support overall price stability, resulting in a decrease in natural gas rates for Southern Bruce customers.

### Aylmer

EPCOR procures most of its natural gas for Aylmer from Enbridge along with some local supply. As a system gas customer, EPCOR pays natural gas prices set through the quarterly rate adjustment process for Enbridge. Changes in the prices approved for Enbridge, along with local supply costs, are contributing to a small increase in natural gas prices for EPCOR's Aylmer customers.

## ABOUT THE QRAM AND NATURAL GAS MARKET PRICES

The QRAM (quarterly rate adjustment mechanism) is the process by which the OEB adjusts the prices that natural gas customers pay for the natural gas they use and to reflect changes in natural gas market prices.

Natural gas is a commodity that is bought and sold on North American energy markets. At any given time, its price fluctuates based on a variety of factors including supply and demand, seasonal changes, levels of stored natural gas and major weather events. Shifts in these or other factors could lead to bill increases or decreases in subsequent quarters, as market prices are passed through to customers. EPCOR updates its forecast of market prices every three months and uses that forecast to seek the OEB's approval of its proposed changes to natural gas commodity prices. These proposed changes cover:

- **Future costs:** Based on a forecast of market prices for natural gas over the next 12-month period.
- **Past costs:** Based on the difference between what the utility previously forecast their customers would pay and what their customers actually paid. This kind of adjustment is needed because the gas prices charged to customers are based on forecasts, which are never 100% accurate. The adjustment for past costs can increase or lower the rate accordingly. For example, if a utility collected more from customers than it paid for gas in the past, the difference is credited back to customers through a lower rate. Likewise, if not enough was collected by the utility, the rate will be higher.

These price changes are approved to take effect on the 1<sup>st</sup> of the month in January, April, July and October each year.

The OEB does not allow natural gas distributors to earn a profit on the sale of gas, regardless of market fluctuations in price.

## SUPPORT FOR CUSTOMERS

Support is available for customers who need assistance with their bill payments. You need to meet certain criteria to qualify for these programs or rules:

- **Low-income Energy Assistance Program (LEAP)**  
This program provides a grant towards a customer's electricity and/or natural gas bill if they're behind on their bill payments and may face having their service shut off. It is for emergency situations. See [OEB.ca/BillHelp](http://OEB.ca/BillHelp)
- **Rules for low-income customers**  
Electricity utilities, natural gas utilities and unit sub-metering providers follow customer service rules specific to low-income customers. These include waiving security deposits and allowing longer payment times under arrears payment plans. See [OEB.ca/BillHelp](http://OEB.ca/BillHelp)

## ABOUT THE OEB

The OEB is the independent regulator of Ontario's electricity and natural gas sectors. We protect the interests of consumers and enable the delivery of clean, reliable, secure and affordable energy that supports economic growth across the province. This includes ensuring that the people and businesses of Ontario pay rates that are reasonable while allowing for needed investments in an energy system that sustains our economy.

A key part of how we deliver on this mandate is through independent adjudication. When an application comes before us, the OEB applies a rigorous, impartial review that balances our legislated objectives and is free from interference.
