To: All Licensed Electricity Distributors  
Independent Electricity System Operator

**Re: Elimination of Reporting of Connection Impact Assessments and System Impact Assessments**

The Ontario Energy Board (OEB) is amending the Reporting and Record-keeping Requirements (RRRs) for electricity distributors and the Independent Electricity System Operator (IESO).

Licensed electricity distributors are required under section [2.1.15](#) of the RRRs to report on completed Connection Impact Assessments and the IESO reports on completed System Impact Assessments under section [RRR 7.1.3](#). These reporting requirements were introduced in response to the requirement that distributors and IESO provide this information as required by [O. Reg. 326/09 \(Mandatory Information RE Connections\)](#).

On July 1, 2021, O. Reg 326/09 was revoked. As a result, the OEB is amending the RRRs to delete sections 2.1.15 and 7.1.3, the reporting requirements associated with the Regulation, effective immediately.

Any questions relating to this letter should be directed to [performance\\_reporting@oeb.ca](mailto:performance_reporting@oeb.ca).

Yours truly,
