RE: Revised Regulated Price Plan Prices for January 18 to February 7, 2022

Further to regulatory amendments filed on January 13, 2022, the Ontario Energy Board (OEB) has reset Regulated Price Plan (RPP) prices for the period from January 18 to February 7, 2022. During this period, all RPP consumers, whether they are on time-of-use (TOU) or tiered pricing, will pay a fixed price of 8.2 cents per kilowatt hour for all the electricity they consume, regardless of the time of day or the total volume consumed.

Background

On [October 22, 2021](#), the OEB published electricity commodity prices set under the RPP for the period beginning November 1, 2021.

On January 13, 2022, amendments to O. Reg. 95/05 (Classes of Consumers and Determination of Rates) under the *Ontario Energy Board Act, 1998* were filed, which require the OEB to set a price of 8.2 cents per kilowatt hour for all three price periods under the TOU price structure (on-peak, mid-peak, and off-peak) and for both tiers under the tiered price structure (tier 1 and tier 2). That price is the same as the off-peak TOU price set by the OEB for the period beginning November 1, 2021.

RPP Prices for January 18 to February 7, 2022

The RPP prices set by the OEB for January 18 to February 7, 2022 are shown in the table below.

January 18 to February 7, 2022 RPP Prices

Time-of-Use RPP Prices	Off-peak	Mid-peak	On-peak
Price per kWh	8.2¢	8.2¢	8.2¢
Tiered RPP Prices	Tier 1	Tier 2	
Price per kWh	8.2¢	8.2¢	

When fixed pricing comes to an end, RPP consumers will revert to paying the prices published by the OEB on October 22, 2021.

Closing

Any questions relating to this letter should be directed to the OEB's Industry Relations Enquiry e-mail at IndustryRelations@oeb.ca. Please include "RPP Prices for January 18 to February 7" in the subject line.
